Discussion

1. Should buildings eligible for state credits only be individually listed on the National Register or listed as contributing to a federally approved district? In other words, should the State program be aligned with the federal program and therefore not allow buildings contributing to a local district to be eligible?
2. Should the small project category of under \$275,000 be continued? Can that category cover all federal and state contributing buildings?
3. Should the 75/25 rule for cost certification processing as described in SB 8 be modified?
4. Should the recovery of unused authorizations be added back to the cap?
5. Should non-profits be eligible for tax credits? As General Partners? What roles?
6. Should a transition rule include a sunset on authorizations?

7. Should the federal 60 month rule be added for phased projects?
8. Other?
